STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS  
OCTOBER 1, 1943

Tobacco Stocks Reported Lower;  
Less Than July 1 Holdings

Stocks of all types<sup>1/</sup> of leaf tobacco owned by dealers and manufacturers in Continental United States and on the Island of Puerto Rico, totaled 2,500,804,000 pounds on October 1, 1943 <sup>2/</sup>. This is a decrease of about 57 million pounds from stocks of July 1, 1943, and the first time in recent years that total stocks have decreased in this quarterly period. Last year total stocks showed an increase of around 77 million pounds. The October 1, 1943, stocks are about 335 million pounds below the 2,836,105,000 pounds reported on October 1, 1942. With the exception of dark air-cured and cigar-wrapper stocks, the production of all classes of domestic tobacco was reported as lower than on the same date last year.

Stocks of Cigarette Types Lower Than Last Year;  
9 Percent Increase in Cigarette Consumption

Stocks of flue-cured tobacco on October 1, 1943, totaled 1,266,666,000 pounds compared with 1,172,917,000 pounds on July 1, and 1,462,619,000 pounds on October 1 a year ago. This is an increase of around 94 million pounds for the quarter, the smallest increase since 1933 for the same period. Average increase for the 5 years 1938-42 was about 192 million pounds. Of the amount shown for October 1, 1943, there is reported 362,639,000 pounds of Type 11; 479,276,000 pounds of Type 12; 302,793,000 pounds of Type 13; and 121,958,000 pounds of Type 14. Lower stocks of flue-cured as of the quarter ending October 1 are partly accounted for by an increase in exports of these types as compared with the previous 3-month period.

On October 1 flue-cured stocks earmarked for export to British areas on Government account totaled 174.2 million pounds, farm-sales-weight. Of this quantity approximately 100.0 million pounds represented purchases from the 1943 crop which had been reported as entering into stocks by October 1. About one-third of these stocks is for shipment to British Empire areas under lend-lease, the remainder to be sold for cash. The allocations of the 1943 flue-cured crop by the Food Distribution Administration permitted the purchase of approximately 300.0 for British areas, slightly over 119 million pounds as a firm commitment for export by June 30, 1944, and approximately 180 million to be purchased and packed for British account but held in a contingency reserve subject to later allocation by the Combined Food Board.

<sup>1/</sup> Figures quoted for type totals in this summary statement are the sums of unstemmed and stemmed leaf as reported. Tables in the body of the report show stocks in detail, subdivided according to recognized groupings; stocks on a farm-sales-weight basis; and stocks owned by dealers and manufacturers separately.

<sup>2/</sup> October 1, 1943, stocks are not strictly comparable with the stocks of October 1, 1942, due to the change in the method of reporting Commodity Credit stocks. This difference in reporting procedure is explained in the April 1, 1943, stocks report.

Burley, Type 31, stocks on October 1, 1943, totaled 590,181,000 pounds, a decrease of 95 million pounds during the quarter. This is practically the same decrease as for the same period last year. The report shows a decrease under stocks of October 1, 1942, of 62 million pounds. Stocks of Maryland tobacco were reported as 43,824,000 pounds on October 1, 1943, an increase of around  $4\frac{1}{2}$  million pounds over July 1 stocks. Maryland stocks were about  $6\frac{1}{2}$  million pounds lower than on the same date a year ago.

Increase in stocks of the principal domestic cigarette types combined, Flue-cured, Burley, and Maryland, was only 3 million pounds for the quarter; these types showed an increase from July 1 to October 1 last year of 140 million pounds.

Foreign-grown cigarette and smoking tobacco (Turkish and other), Type 90, totaled 56,146,000 pounds on October 1, 1943, a decrease of about 29 million pounds from stocks on hand on October 1, 1942.

About 445 million pounds of flue-cured tobacco entered stocks over auction floors during the quarter, and about 12 million pounds of Maryland through auction and closed bid sales. Comparative figures for last year show around 500 million pounds of flue-cured and 23 million pounds of Maryland as entering stocks for the same period.

Tax-paid withdrawals of cigarettes during the quarter totaled 69,134 million, compared with 63,615 million for the same period in 1942. This indicates an increase of nearly 9 percent in cigarette consumption above last year. The actual increase is even greater than is indicated by the withdrawals figures, due to the increased volume of tax-free cigarettes shipped to armed forces overseas.

Dark Tobaccos Show  
Decreases From a Year Ago

Flue-cured stocks on October 1, 1943, totaled 168,871,000 pounds, a decrease of about 16 million pounds from stocks reported on July 1, 1943, and a decrease of 4 million pounds from stocks reported on October 1, 1942. Of the total reported, 26,840,000 pounds were of Type 21; 105,135,000 pounds of Type 22; 36,750,000 pounds of Type 23; and 146,000 pounds of Type 24.

Flue-cured tobacco is used principally for the manufacture of snuff, and tax-paid withdrawals of this product during the quarter indicate a consumption of 13,201,000 pounds, a 4-million pound, or 46 percent, increase over the same period last year, and the highest snuff withdrawal figure on record for this quarter. About  $2\frac{1}{2}$  million pounds of flue-cured tobacco were removed from stocks during the 3 months for manufacture into nicotine sulphate and nicotine alkaloid under the 1942-43 Diversion Program.

Stocks of dark air-cured, Types 35, 36, and 37, totaled 58,016,000 pounds on October 1, 1943, compared with 64,250,000 pounds on July 1, a decrease of 10 percent during the quarter. Total dark air-cured stocks, however, showed an increase over holdings of a year ago, the increase being reported in Types 35 and 37, with Type 36 stocks slightly lower.

Data on manufacture of plug chewing tobacco indicate a slight increase over last year, while manufacture of smoking tobacco shows a decrease. The increased consumption of snuff and chewing tobaccos is partly due to the prohibition of smoking in many war plants.

Cigar-leaf Stocks Less Than Last Year;  
Cigar Consumption Decreased

Total stocks of domestic cigar-leaf tobacco were about 293 million pounds on October 1, 1943, compared with 332 million reported on October 1, 1942. All types except Type 62 showed decreases from July 1 stocks - about 36 million pounds less, compared with a decrease of 41 million pounds for the same period a year ago. Deliveries of Type 62 are usually made during this quarter, and the addition to stocks of approximately 3 million pounds of the 1943 crop accounts for the increase in this type. Production of cigar-leaf of the 1942 crop in continental United States was about 22 million pounds under 1941-crop production, and production of Puerto Rican, Type 46, is estimated at  $8\frac{1}{2}$  million,  $21\frac{1}{2}$  million pounds, or 72 percent, under 1941 production.

Stocks of cigar-filler tobacco were reported as 163,076,000 pounds on October 1, 1943, of which 96,664,000 pounds were Pennsylvania Seedleaf; 21,903,000 pounds, Gobhardt, Type 42; 10,708,000 pounds, Zimmer, Type 43; 5,681,000 pounds, Dutch, Type 44; 22,215,000 pounds, Puerto Rican Type 46, in continental United States, and 5,905,000 pounds in Puerto Rico. October 1 stocks showed a decrease of 12 percent from July 1 stocks, and were 16 percent lower than October 1 stocks a year ago.

Cigar-binder type stocks were reported as 116,337,000 pounds on October 1, 1943, a decrease of 12 percent from July 1 stocks, and lower by 8 percent than stocks of October 1, 1942. <sup>3/</sup> Of the total shown, 20,617,000 pounds were Type 51; 26,932,000 pounds, Type 52; 1,528,000 pounds, Type 53; 33,348,000 pounds, Type 54; 33,052,000 pounds, Type 55; and 860,000 pounds, Type 56.

Cigar-wrapper stocks showed an increase over last quarter and also over stocks reported a year earlier. Total cigar-wrapper stocks were reported as 13,832,000 pounds, 6,641,000 pounds in Type 61, and 7,191,000 pounds in Type 62.

On October 1, 1943, foreign-grown cigar-leaf stocks totaled 22,064,000 pounds, about 1/2 million pounds less than the July 1 figure. Cuba (Havana) stocks were 15,940,000 pounds; Sumatra and Java, 5,356,000 pounds; Philippine Islands (Manila), 460,000 pounds, and Other Foreign-grown cigar-leaf 308,000 pounds. Total stocks were slightly higher than last October 1.

Tax-paid withdrawals of all classes of cigars totaled 1,279 million during the period June-Sept., 1943. This is a decrease of 16 percent from withdrawals for the comparable period in 1942 of 1,530 million. The data indicate that the decrease was in the lower-priced classes, as withdrawals of all classes retailing above 8 cents substantially increased. Manufacture of scrap chewing tobacco indicates a slight decrease from last year.

Miscellaneous Domestic stocks on October 1, 1943, totaled 1,791,000 pounds, of which 379,000 pounds were reported as Type 71, Eastern Ohio; 549,000 pounds as Type 72, Perique; and 863,000 pounds as Type 73, Other Miscellaneous Domestic. Stocks of these types were 2,226,000 pounds on July 1, 1943.

<sup>3/</sup> In checking apparent errors in July 1 stocks figures for Type 51 as published in the July 1 stocks report, it was discovered that a number of firms had incorrectly reported stocks of this type on April 1, 1943. The check revealed further errors in reporting Types 41, 42, 51, 52, and 54 on April 1, 1943. Revisions in April figures, as based on the corrected information, are shown on pages 5 and 6 of this report.

### EXPLANATION OF GROUP SYMBOLS

#### GROUPS OF TYPES 11, 12, 13, and 14:

A-Wrappers  
B-Leaf, and smoking leaf  
C-Cutters  
X-Lugs and primings  
S-Scrap  
N-Nondescript

#### GROUPS OF TYPES 21, 22, 23, and 24:

A-Wrappers  
B-Heavy leaf  
C-Thin leaf  
X-Lugs  
S-Scrap  
N-Nondescript

#### GROUPS OF TYPE 31:

A-Wrappers  
B-Bright leaf, red leaf and tips  
C-Lugs and Cutters  
X-Trash and flyings  
S-Scrap  
N-Nondescript

#### GROUPS OF TYPE 32:

B-Heavy leaf or dull crop  
C-Thin leaf or bright crop  
X-Seconds and ground leaves  
S-Scrap  
N-Nondescript

#### GROUPS OF TYPES 35, 36, and 37:

A-Wrappers  
B-Heavy leaf  
C-Thin leaf  
X-Lugs  
S-Scrap  
N-Nondescript

#### GROUPS OF TYPE 41:

B-Binders or tops  
C-Fillers (farm wrappers)  
X-Stemming grades  
Y-Farm fillers or ground leaves  
S-Scrap  
N-Nondescript

#### GROUPS OF TYPES 42, 43, and 44:

C-Fillers (farm wrappers)  
X-Stemming grades  
Y-Farm fillers or ground leaves  
S-Scrap  
N-Nondescript

#### GROUPS OF TYPE 46:

C-Superior  
X-Inferior  
Y-Defectuous  
S-Scrap (Picadura)  
N-Nondescript

#### GROUPS OF TYPES 51, 52, and 53:

A-Wrappers  
B-Binders, seconds and brokos  
C-Fillers and short darks  
X-Stemming grades  
Y-Sand-leaf fillers or ground leaves  
S-Scrap  
N-Nondescript

#### GROUPS OF TYPES 54 and 55:

B-Binders  
C-Fillers  
X-Stemming grades  
Y-Sand-leaf fillers or bottom leaves  
S-Scrap  
N-Nondescript

#### GROUPS OF TYPES 56 and 45:

B-Binders  
C-Fillers  
X-Stemming grades  
Y-Ground leaves  
S-Scrap  
N-Nondescript

#### GROUPS OF TYPES 61 and 62:

A-Wrappers  
B-Stout wrappers and binders  
C-Fillers or tips  
X-Filler brokos  
S-Scrap  
N-Nondescript

#### GROUPS OF TYPES 81, 82, and 83:

A-Wrappers  
C-Fillers  
S-Scrap

REVISIONS IN APRIL 1 FIGURES AS PUBLISHED IN THE JULY 1 TOBACCO STOCKS REPORT. 1/

1/ Subject to revision.

2/ See supplementary Burley report on page 15.

3/ Includes existing stocks of filler tobacco of type 45; from crops prior to 1940. Beginning with the 1940 crop, it is assumed that the complete transition from filler type to binder type tobacco had taken place.

4/ Does not include stocks owned by Netherlands Indies Produce Corporation held in free trade zone.

\* Revisions in July 1 report.

1/ For factors used in converting various weights for Types 11-62, see table 3 on page 8 of U. S. Department of Agriculture Circular No. 435, Tobacco Shrinkages and Losses in Weight in Handling and Storage. October 1 figures subject to revision.

2/ A factor of 1.11 was used for converting unstemmed stocks to farm-sales-weight equivalent.

3/ A factor of 1.333 was used for converting stemmed stocks to unstemmed equivalent; a factor of 1.09 was used for converting stocks on unstemmed basis to farm-sales-weight equivalent.

4/ A factor of 1.205 was used for converting stemmed stocks to unstemmed equivalent.

5/ No conversion was made of unstemmed stocks.

\* Revisions in July 1 report.

1/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners subject to provisions of The Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis. Figures are as reported to date; no revisions of this table will be made.

2/ The quantities shown as owned by manufacturers include tobacco which is held under dealer registries of manufacturers and also tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers; the quantities also include stocks held by the Commodity Credit Corporation which are earmarked for export and not actually available to manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export. The table should therefore be considered as representing only the approximate quantities owned respectively by dealers and manufacturers.

3/ Includes stocks on the Island of Puerto Rico.

4/ Does not include stocks owned by Netherlands Indies Produce Corporation held in the free trade zone.

Table 5.-Stocks of leaf tobacco owned by dealers and manufacturers, summary by types, October 1, 1943, compared with other quarters 1/

1/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners except (a) the original growers of tobacco, (b) manufacturers who in the first three quarters of 1942, according to the returns of the Commissioner of Internal Revenue, manufactured less than 35,000 pounds of tobacco, less than 185,000 cigars, or less than 750,000 cigarettes, pursuant to the provisions of The Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress.

2/ Subject to revision.

3/ Includes existing stocks of filler tobacco of Type 45, from crops prior to 1940. Beginning with the 1940 crop, it is assumed that the complete transition from filler type to binder type tobacco had taken place.

4/ Does not include stocks owned by Netherlands Indies Produce Corporation held in the free trade zone.
